

CONTROL PROGRAM
for biological products
EXAMPLE

GREENHOUSE AND TUNNEL STRAWBERRY

TRANSPLANTING	AFTER TRANSPLANTING	DURING THE FLOWERING PERIOD		
CONTROL OF ROOT DISEASES	STIMULATING ROOT GROWTH, PROMOTING PLANT GROWTH	GREY MOULD (<i>Botrytis</i>)		MANAGEMENT OF STRESS FACTORS, PROMOTION OF NUTRIENT CYCLING
LALSTOP® G46 WG <i>Pythium, Rhizoctonia, Fusarium, Phytophthora</i>	LALRISE® VITA	PRESTOP® MIX	LALSTOP® G46 WG	LALSTIM® OSMO
First application at transplanting, repeat after one month	First application 1–2 weeks after transplanting, repeat at intervals of 4 weeks	From the beginning of flowering	From the beginning of flowering, repeat at intervals of 6–7 days	Treatment 24h before stress conditions
MIXING INTO THE GROWTH SUBSTRATE ¹⁾ 20–50 g/m ³ DIPPING OF BAREROOT SEEDLINGS ²⁾ 0,05 % solution DRENCHING OF PLUG PLANTS ³⁾ 12,5 g/1000 seedlings DRENCHING/DRIP IRRIGATION ³⁾ 20–25 g/1000 plants	THROUGH IRRIGATION ³⁾ 200 g/1000 plants	POLLINATOR ASSISTED DISTRIBUTION ⁴⁾ 300–500 g/ha during the flowering Add a thin layer to the dispenser at the hive entrance every morning or if needed during the flowering period	FOLIAR SPRAYING ⁵⁾ 250–300 g/ha (Spraying volume 500–1000 l/ha)	FOLIAR SPRAYING ⁵⁾ 2–4 kg /ha (Spraying volume 250–1000 l/ha)

- 1) Mixing with the growing medium as an aqueous mixture, the amount of water can be adjusted according to the humidity of the substrate.
- 2) Submerge the seedlings in LALSTOP G46 WG solution so that the roots and the growing point are completely submerged. 200 l of 0,05 % solution is sufficient for immersion of approx. 10 000 frigo seedlings.
- 3) The amount of water can be adjusted according to the humidity of the substrate and the need for irrigation.
- 4) Prestop Mix is applied via bees. For application, 2 beehives equipped with a spreader per hectare. In greenhouses/tunnels 1–2 bumblebee hives/1000 m².
- 5) LALSTOP G46 WG and LALSTIM OSMO can be sprayed on the foliage in the same mixture.

For more information on compatibility, contact the manufacturer or distributors: www.verdera.fi
Always use plant protection products in a safe manner, in accordance with the label instructions.
